

The Scrolls of Blessing

*These scrolls of blessing were given as a concrete remembrance
of a person's time with an ancient listener,
who traveled from village to village,
helping people solve life challenges
that they had not found an answer for on their own.*

*After listening to the person story
and traveling their lifeline
the ancient listener would then offer them
the wisdom he had on the matter.*

*Before departing the ancient listener would
pull from his cloak a Life-Blessing Scroll.
The scroll became a way of moving
into a balanced period of change.*

*This would lead them into a place of understanding
concerning the life challenge that had been
addressed during the ancient listener's visit.*
